

## King County Department of Assessments

### Executive Summary Report

#### Characteristics Based Market Adjustment for 1999 Assessment Roll

**Area Name / Number:** Green Lake / 43

**Last Physical Inspection:** 1998

#### **Sales - Improved Analysis Summary:**

Number of Sales: 378

Range of Sale Dates: 1/97 through 12/98

#### **Sales - Improved Valuation Change Summary:**

	Land	Imps	Total	Sale Price	Ratio	COV
1998 Value	\$76,500	\$132,000	\$208,500	\$243,500	85.6%	15.78%
1999 Value	\$87,400	\$150,200	\$237,600	\$243,500	97.6%	15.30%
Change	+\$10,900	+\$18,200	+\$29,100	N/A	+12.0%	-0.48%*
%Change	+14.2%	+13.8%	+14.0%	N/A	+14.0%	-3.04%*

\*COV is a measure of uniformity, the lower the number, the better the uniformity. The negative figures of -0.48% and -3.04% actually indicate an improvement.

Sales used in Analysis: All sales of single family residences on residential lots that appeared to be market sales were considered for this analysis. Multi-parcel sales, multi-building sales, mobile home sales, sales of new construction where less than a fully complete house was assessed for 1998, and sales where the 1998 assessed improvements value was \$10,000 or less were also excluded.

#### **Population - Improved Parcel Summary Data:**

	Land	Imps	Total
1998 Value	\$78,800	\$131,000	\$209,800
1999 Value	\$90,100	\$149,200	\$239,300
%Change	+14.3%	+13.9%	+14.1%

Number of improved single family home parcels in the population: 3603.

The population summary excludes parcels with multiple buildings, mobile homes, and new construction where less than a fully complete house was assessed for 1998. Also, parcels with a 1998 assessed improvements value of \$10,000 or less were excluded.

**Summary of Findings:** The analysis for this area consisted of a general review of applicable characteristics such as grade, age, condition, stories, living areas, views, waterfront, lot size, land problems and neighborhoods. The results showed that including several characteristic-based and neighborhood-based variables in the update formula improved uniformity of assessments throughout the area. For instance, there were several properties that required individual adjustments, due to 1998 assessment ratios (assessed value/sales price) being significantly higher than the average, and the formula adjusted these properties downward. The average assessment ratio of properties with a lot size less than 3500 sq. ft. was higher. Properties that were influenced by extreme traffic noise were at a higher assessment ratio than the rest. Also, one-story houses had a higher assessment ratio. On the other hand, the average assessment ratio for houses built on or after 1921 but before 1941 was lower than that of others. The formula adjusted for these differences, thus improving equalization.

Since values described in this report improve assessment levels, uniformity and equity, we recommend posting them for the 1999 assessment roll.

## Sales Sample Representation of Population – Year Built

Sales Sample		
Year Built	Frequency	% Sales Sample
1900	6	1.59%
1910	107	28.31%
1920	57	15.08%
1930	107	28.31%
1940	20	5.29%
1950	24	6.35%
1960	10	2.65%
1970	6	1.59%
1980	8	2.12%
1990	17	4.50%
1998	16	4.23%

## Comparison of 1998 and 1999 Per Square Foot Values by Year Built

These charts show a significant improvement in assessment level and uniformity by year built as a result of applying the 1999 recommended values.

The values shown in the improvement portion of the chart represent the total value for land and improvements.

## Comparison of 1998 and 1999 Per Square Foot Values by Above Grade Living Area

These charts show a significant improvement in assessment level and uniformity by above grade living area as a result of applying the 1999 recommended values.

The values shown in the improvement portion of the chart represent the total value for land and improvements.

## Comparison of 1998 and 1999 Per Square Foot Values by Grade

These charts show a significant improvement in assessment level and uniformity by building grade as a result of applying the 1999 recommended values.

The values shown in the improvement portion of the chart represent the total value for land and improvements.
